Privacy needed?

Simple door security for your
home office with Code Handle®

Experience a safer
and more open world

Secure your home office with an elegant Code Handle

Put an end to unwanted disturbances with a battery-powered Code Handle PIN lock

Does your new home arrangement need a security rethink?

A Code Handle lock on your new office door puts a barrier between home and working life. It is simple to fit and even easier to use. This battery powered device takes a few minutes to install. There's no wiring or drilling, and no need for a new door or cylinder. To unlock your home office, enter a PIN code on the handle's keypad. Close the door when you leave and Code Handle locks behind you.

Code Handle is already trusted everywhere private doors meet public spaces:

at doctor's surgeries, dental treatment rooms and physiotherapy suites; retail stockrooms and school staff rooms; cafe toilets, shared office spaces and many more places. As you are working more often from home, your office room deserves a smart and simple security upgrade.

Do not disturb?

Unexpected interruptions make a great viral video. But they might not amuse your colleagues or customers. With a Code Handle door lock on your home office, all your work calls and presentations can happen without interruption.

Are your files safe?

Do you worry about someone seeing or damaging confidential documents, deleting a presentation, or closing a tab on your browser? A Code Handle lock fitted to your home office door keeps curious eyes out — until you let them in.

Create a proper working environment in your home

Digital PIN security inside a modern steel and chrome handle — no ugly push-button unit in sight

Simple

Install at almost any interior door with two screws and no specialist tools. On a study, spare room or basement, Code Handle fits perfectly

Autolock

PIN security locks the office.

You can exit hands-free (and worry free) because Code Handle can lock automatically, when it closes behind you

Convenient

Locking is 100% keyless: Come and go with a personal PIN. Standard batteries slot inside and work for years between changes*

*:2x CR2 battery; 30,000 lock/unlock cycles lifetime with typical use

A competition was held to see who could install a Code Handle in the quickest time and the winning entry was only 26 seconds

Two screws and a few spare minutes are all you need:

Code Handle is used in many different situations to keep private areas secure, it takes next to no time to fit. To see how, just scan the QR code and view on your mobile the video.

Click or scan to see the installation video
