

CLIQ® Integrations

ASSA ABLOY
Opening Solutions

Seamless integration with all kinds of business
process software to meet all your business needs

Experience a safer
and more open world

Advantages of CLIQ Web Manager

CLIQ Web Manager makes it easy to program, reprogram or audit every CLIQ key, cylinder, or padlock. Your access management interface is accessible from anywhere with an internet connection, via secure login over HTTPS and multifactor authentication.

-  Real-time data management, ensuring the privacy of sensitive information
-  Integration with customer software; integrated information across separate databases
-  Streamlines business processes and operations with an efficient and intuitive data management interface
-  Scalable software allowing new functions or processes to integrate easily within your existing interface
-  Allows different options for your business' security needs, enabling totally customized solutions
-  Improves accuracy, consistency and adds another layer of data security for all your data

CLIQ Web Manager is especially suited to organizations with multiple administrators located at different sites

Components of a CLIQ system

Software to manage access rights for multiple users, doors and time periods

Range of programming devices to remotely transfer and update access rights for keys

Programmable, battery-powered keys

Wide range of programmable cylinders and padlocks for different access points

Now, with CLIQ Web Manager Integration, you can do even more

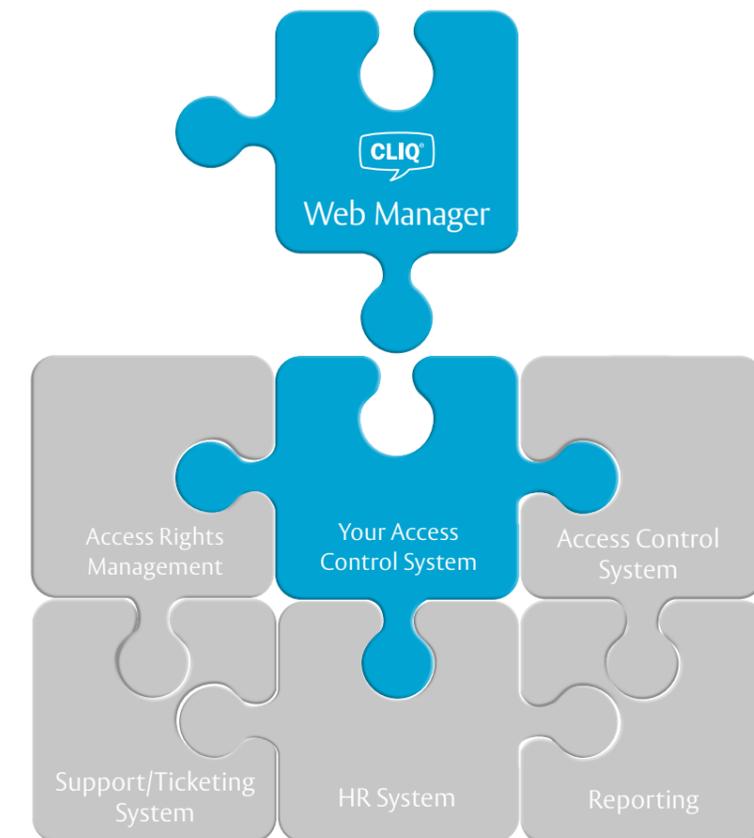

Want to manage your whole security platform from a single interface?

CLIQ Web Manager can act as master or the secondary system in the platform. With CLIQ Web Manager's standard web service interface, you can connect to your own or a third party software seamlessly.

Need to synchronize your data across multiple systems?

CLIQ Web Manager integration allows your IT system to consolidate data from multiple sources. This seamless connectivity helps you manage access rights efficiently, anytime and from anywhere.

Already a CLIQ customer?

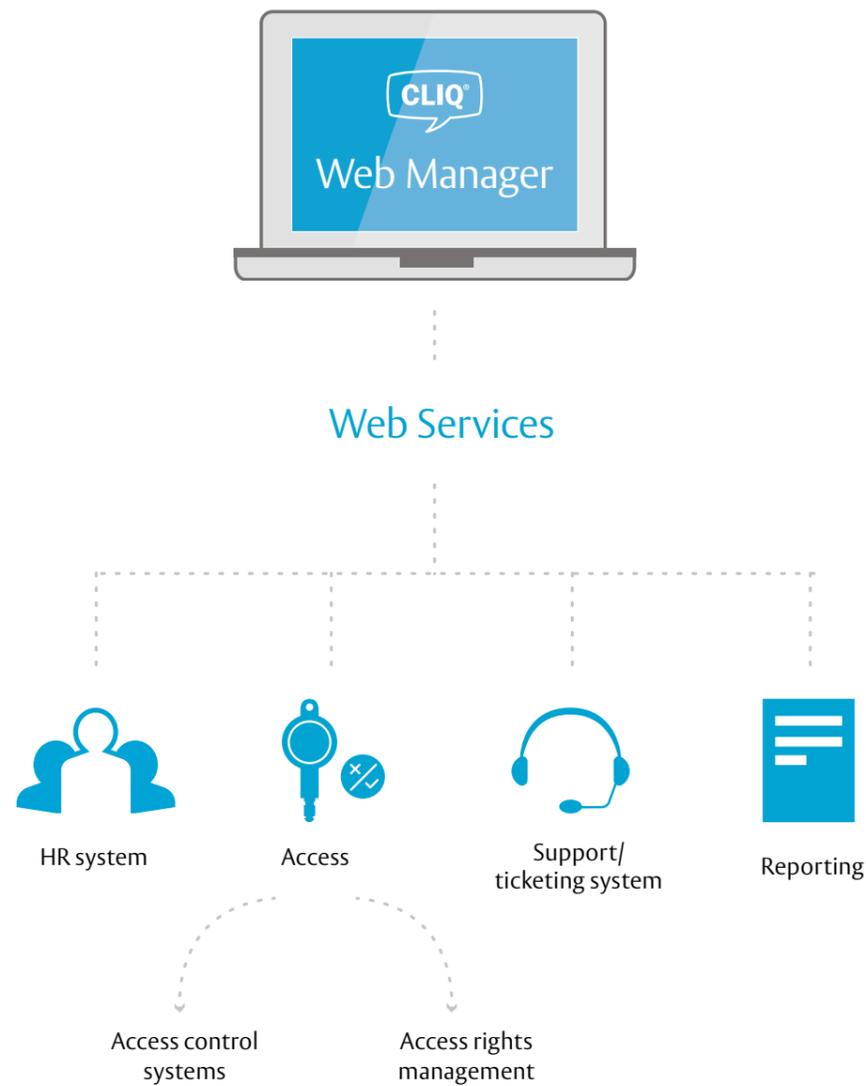

Web Manager integration puts the power of layered security management at the heart of your organization. It is straightforward to install the Web Manager within existing business process software. Its open architecture and easy interoperability offer unlimited possibilities.

Not yet a CLIQ user?

You can add CLIQ cable free cylinders and padlocks to upgrade security at any of your remote sites. You don't need to enter data directly into a standalone CLIQ Web Manager. Easy interoperability means you use the admin software or app of your choice and our integration handles the rest.

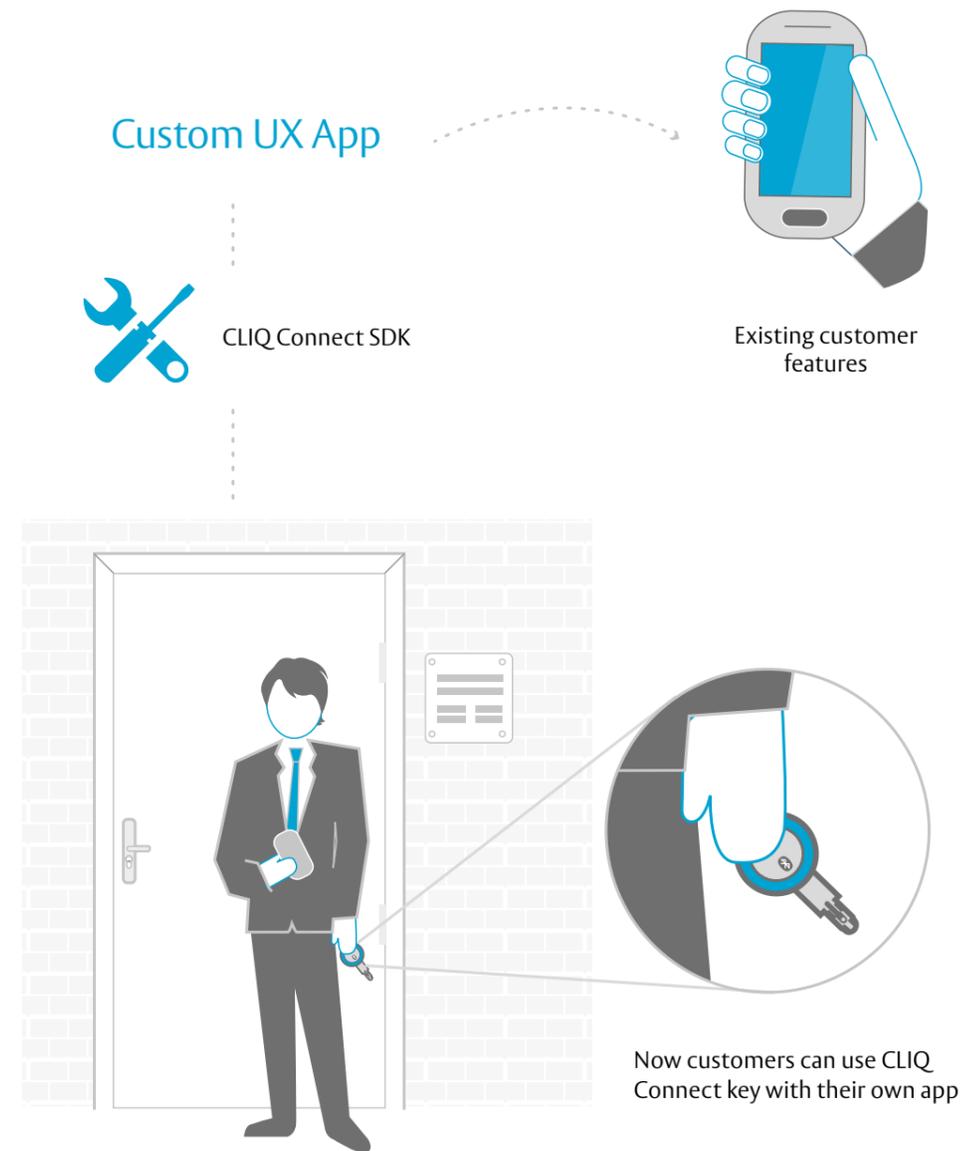

Option 1: CLIQ Web Manager Web Services

Use comprehensive Web Services and business process management around the CLIQ Web Manager

Option 2: Software Development Kit

Incorporate CLIQ Connect functions within your existing app

Main benefits of integration:

Saves operational costs

Seamless data connectivity

Improves your organization's internal workflow

Control via a single UI

Improve accuracy by cutting data input duplication

Reduce costs and make annual budgeting easier

Save time on multiple operational processes

Streamline internal workflow

Easy access control management

Vary integration options to suit your business

Learn more about CLIQ

Keys or access control? Why not both?

CLIQ is a security locking system with high-end microelectronics, programmable keys and cylinders, fit for all business types.
